PROJECTS

- Netflix-Clone

Technology used: JavaScript, HTML, CSS

Objectives of the project: To create a clone of the Netflix website that is responsive and user-friendly.

API integration: The app uses the TMDb API to retrieve movie data.

User interface: The app has a clean and modern user interface that closely resembles the Netflix website.

Responsive design: The app is designed to be responsive and optimized for different screen sizes.

Automatic scrolling: Implement an automatic scrolling feature that allows users to automatically browse through a list of movies without having to manually click through each one.

Movie browsing: Users can browse and search for movies by different categories such as popular, top rated, and upcoming.

- Todo_App_list

Technology used: JavaScript, HTML, CSS

Objectives of the project: To create a user-friendly app that allows users to keep track of their tasks.

This project is created using HTML, CSS & JS Skills & it is responsive too.

User interface: The app has a clean and intuitive user interface that allows users to add, edit, and delete tasks easily.

Task creation: Users can create tasks by entering a task name.

Task editing: Users can edit task details, such as the task name and due date, by clicking on the task.

Task completion: Users can mark tasks as completed by checking the checkbox next to the task name.

Task deletion: Users can delete tasks by clicking the delete button next to the task.
